Because Scott Foresman Art incorporates applications of the most recent research on learning in art, teachers safely reply on the curriculum, instructional models, and methods that comprise the program. The authors who are themselves researchers in art teaching and learning and have published works in their specific fields strengthens the empirical base of the program. Throughout the development of Scott Foresman Art, Pearson Scott Foresman conducted a number of market research studies. During various sessions held across the country, teachers had the opportunity to review prototype lessons and features of the program and provide feedback to a non-employee, moderator. The qualitative data was carefully considered during the development of the program. In addition, a number of surveys were conducted at state and national meetings as well as by telephone to identify key features and trends that teachers feel are important in the teaching of art.
